**Software Languages:** Javascript, ES6, HTML, CSS, React, Node, Express, SQL, MongoDB, GraphQL

## Projects

### Code Kings

Github Repository: [https://github.com/hhundley/Code\\_Kings](https://github.com/hhundley/Code_Kings)

Deployed Application: <https://safe-ravine-42690.herokuapp.com/>

- Code Kings is a community led app designed to help connect those with ideas to those who can realize those ideas. Core responsibilities in the team included building api's and routes, building MongoDB models, connecting client with server, and designing React app.

### The Text Tool

Github Repository: <https://github.com/hhundley/the-text-tool.git>

Deployed Application: <https://secret-scrubland-70160.herokuapp.com/>

- Built and deployed a text editor that caches user input to save progress in real time. The Text Tool is a Progressive Web Application and can function both online and offline
